MSDS E

SECTION I:PRODUCT IDENTIFICATION

Product Types: Q UIKRETE® DRY PACKAGED PORTLAND CEMENT BASED PRODUCTS (SERIES 4)

OUIKRETE® Product Name	Code#	OUIKRETE® Product Name	Code #
Mortar Mix	1102	MASON MIX	1136
BASE COAT STUCCO	1139	EXTERIOR STUCCO	1209
FINISH COAT STUCCO	1201	FOAM COATING	1219
MASONRY COATING	2400	MARBLE STUCCO	1802
QUIKWALL® SURFACE BONDING CEMENT	1230	HEAVY DUTY MASONRY COATING	1300
POOL PLASTER	1319	GLASS BLOCK MORTAR	1610
ROOF TILE MORTAR	1140	POOL FINISH	1800
POLYMER MODIFIED SANDED TILE GROUT	1489	SANDED TILE GROUT	1156
THIN-SET FLOOR MIX	1548	THIN-SET WALL MIX	1554
OMNI GROUT SANDED	1490	THIN-SET MULTI-PURPOSE	1550
PEBBLE FINISH	1806	THIN-SET SANDED	1547
BULK MASONRY MORTARS	1162	INCA 1000 MINE SEALANT	1225-50
ONE COAT FIBER REINFORCED STUCCO CONCENTRATED			1216-93
QUIKRETE® ONE COAT FIBERGLASS REINFORCED STUCCO			1200
QUIKRETE® ONE COAT FIBERGLASS REINFORCED STUCCO, CONCENTRATED			1216

(ALSO APPLIES TO SPECIALTY AND/OR CUSTOM DESIGNED MORTARS & STUCCOS)

SECTION II - HZ ARDOUS INGEDIENTS IDENTITY INFORMATION

Hazardous Components	CAS No.	PEL (OSHA)	TLV (ACGIH)		
Silica Sand, crystalline	14808-60-7	mg/M ³	mg/M ³ 0.05 (respirable)		
Portland Cement	65997-15-1	5	5		
May Contain one or more of the following ingredients:					
Pulverized Limestone	01317-65-3	5	5		
Iron Oxide Pigments	01309-37-1	5	5		
Lime	01305-62-0	5	5		
	or 39445-23-3				
Clay	01332-58-7	5	5		

Other Limits: National Institute for Occupational Safety and Health (NIOSH). Recommended standard maximum permissible concentration 0.05 m g/M³ (respirable free silica) as determined by a full-shift sample up to 10-hour working day, 40-hour work week. See NIOSH Criteria for a Recommended Standard Occupational Exposure to Crystalline Silica.

Product Types: Q UIKRETE® DRY PACKAGED PORTLAND CEMENT BASED PRODUCTS (SERIES 4)

MSDS E

SECTION III -PMCALCHMICAL CHRACTERISTICS

Aparance: Gray to gray-brown colored powder. Some products contain coarse aggregate. (Quikrete Vinyl Concrete

Patcher available in white)

Speife Caity:

2.6 to 3.15

Meling Point

2700°F

Boilng Point:

2700 °F

Mor Pressure: Solibilty in Mer: None Slight Mar Density:
Odor:

None None Expration Rate:

None

Somblies in acci.

SECTION INFIRE AND EXLOSION MARD DATA

Fhmmabilty: Noncombustible and not explosive.

SECTION VREACTIVE TO ATA

Stabilty: Stable.

Incomptibilty (Material to Avid) Contact of silica with powerful oxidizing agents such as fluorine, chlorine trifluoride, manganese trioxide, oxygen difluoride, may cause fires.

Hardous Decompsition or Bypoducts: Silica will dissolve in Hydrofluoric Acid and produce a corrosive gas - silicon tetrafluoride.

Hardous Polymerization: Will Not Occur.

Condition to Avid: Keep dry until used to preserve product utility.

SECTION V-HALTHAZRD DATA

Route()ofEntry: Inh

Inhalation, Skin, Ingestion

Acute Epsure: Product becomes alkaline when exposed to moisture. Exposure can dry the skin, cause alkali bums and effect the mucous membranes. Dust can irritate the eyes and upper respiratory system. Toxic effects noted in animals include, for acute exposures, alveolar damage with pulmonary edema.

Chronic Epsure: Dust can cause inflammation of the lining tissue of the interior of the nose and inflammation of the comea. Hypersensitive individuals may develop an allergic dermatitis. Respirable crystalline silica (quartz) can cause silicosis, a fibrosis (scarring) of the lungs and possibly cancer. There is evidence that exposure to respirable silica or the disease silicosis is associated with an increased incidence of Scleroderma, tuberculosis and kidney disorders.

Carcinogenicity Listings:

NTP: OSHA: Known carcinogen

USTIA:

Not listed as a carcinogen

IARC Monographs: California Proposition 65: Group 1 Carcinogen Known carcinogen

NTP: The National Toxicology Program, in its Ninth Report on Carcinogens' (released May 15, 2000) concluded that Respirable crystalline silica (RCS), primarily quartz dusts occurring in industrial and occupational settings, is known to be a human carcinogen, based on sufficient evidence of carcinogenicity from studies in humans indicating a causal relationship between exposure to RCS and increased lung cancer rates in workers exposed to crystalline silica dust (reviewed in IAC, 1997; Brown et al., 1997; Hind et al., 1997)

<u>IARC</u>: The International Agency for Research on Cancer (FARC) concluded that there was " sufficient evidence in humans for the carcinogenicity of crystalline silica in the forms of quartz or cristobalite from occupational sources," and that there is "sufficient evidence in experimental animals for the carcinogenicity of quartz or cristobalite." The overall IARC evaluation was that Erystalline silica inhaled in the form of quartz or cristobalite from occupational sources is carcinogenic to humans (Group 1)." The IARC evaluation noted that Earci nogenicity was not detected in all industrial circumstances or studies. Carcinogenicity may be dependent on inherent characteristics of the crystalline silica or on external factors affecting its biological activity or distribution of its polymorphs." For further information on the IARC

evaluation, see <u>IARC Monographs on the Evaluation of carcinogenic Risks to Humans</u>, Volume 68, Silica, Some Silicates...'(1997)

Signs and Symptoms of Epsure: Symptoms of excessive exposure to the dust include shortness of breath and reduced pulmonary function. Excessive exposure to skin and eyes especially when mixed with water can cause caustic burns as severe as third degree.

MedicalConditions Geraly Aggranted by Epsure: Individuals with sensitive skin and with pulmonary and/or respiratory disease, including, but not limited to, asthma and bronchitis, or subject to eye irritation, should be precluded from exposure. Exposure to crystalline silica or the disease silicosis is associated with increased incidence of scleroderma, Tuberculosis and possibly increased incidence of kidney lesions.

Emergency First Aid Procedures:

Eyes: Immediately flush eye thoroughly with water. Continue flushing eye for at least 15 minutes, including under lids, to remove all particles. Call physician immediately.

Sha: Wash skin with cool water and pH-neutral soap or a m ild detergent. Seek medical treatment if irritation or inflammation develops or persists. Seek immediate medical treatment in the event of burns.

Inhahtion: Remove person to fresh air. If breathing is difficult, administer oxygen. If not breathing, give artificial respiration. Seek medical help if coughing and other symp toms do not subside. Inhalation of large amounts of portland cement require immediate medical attention.

Ingestion: Do not induce vomiting. If conscious, have the victim drink plenty of water and call a physician immediately.

SECTION II -PRECAUTIONS FOR SAFE HINDLINGAND USE

Six: If spilled, use dustless methods (vacuum) and place into covered container for disposal or use if not contaminated or wet. Use adequate ventilation.

Write Dispsal Method: The packaging and material may be land filled; however, material should be covered to minimize generation of airborne dust. This product is <u>not</u> classified as a hazardous waste under RCRA or CERCLA.

SECTION HI -CONTROL MEASURESPERSONAL PROTECTION

Inhabition: DO NOT BREATE DUST. In dusty environments, the use of an OSHA, MSHA or NIOSH approved respirator is recommended. Local exhaust can be used, if necessary, to control airborne dust levels. Eyes: Wear tight fitting goggles.

She: The use of barrier creams or impervious gloves, boots and clothing to protect the skin from contact is recommended. Following work, workers should shower with soap and water. Precautions must be observed because bums occur with little warning -- little heat is sensed.

WARN EMPLOYEES AND/OR CUSTOMERS OF THE HAZARDS AND REQUIRED OSHA PRECAUTIONS ASSOCIATED WITH THE USE OF THIS PRODUCT.

NOTE: The information and recommendations contained herein—are based upon data believed to be correct. However, no guarantee or warranty of any kind, express or implied, is made with respect to the information contained herein. We accept no responsibility and disclaim all liability for any harmful effects which may be caused by exposure to silica contained in our products.
